- Netlify
- Heroku
- Github
- Chrome Dev Tools
- vs code editor
- Figma

### Projects:

#### 1. Car Deal (Full-stack site)

- A. [Live Site](#)
- B. [Client-Side Code Link](#)
- C. [Server-Side Code Link](#)

**Used in this site:** html,css,bootstrap,js,reactjs,reactrouter,reacthook form,firebase,express,mongodb and heroku

- It's collection of offensive cars only
- Visitors can see cars collections. But needed to register or log in to place orders.
- It's a very fast reloadable and one-page application

#### 2. Travel and Tour (Full-stack site)

- A. [Live Site Link](#)
- B. [Client-Side Code Link](#)
- C. [Server-Side Code Link](#)

**Used in this site:** HTML,CSS,bootstrap,js,react js,react-router,react hook form,firebase,express,MongoDB and Heroku

- It's a travel booking site
- Visitors can see visiting places in Bangladesh. But needed register or log in to place orders
- It's a very fast reloadable and one-page application

#### 3. Martial Arts Academy (Front-end site)

- A. [Live Site Link](#)
- B. [Client-Side Code Link](#)

**Used in this site:** HTML,CSS,bootstrap,js,react js,react-router

- It's an online martial arts learning site and only a front-end site.
- Visitors can see many martial arts courses. But not added register or login system
- It's a very fast reloadable and one-page application
